### **DETAILED ACTION**

The Examiner notes that the following claims have not been considered because of their improper claim dependence: claims 27, 37-39, 45-50, 52-59, 61, and 65-66. Once amended, they will be considered a part of the election/restriction requirement.

#### ***Election/Restrictions***

Restriction to one of the following species is required under 35 U.S.C. 121:

- A. Claims 1-10, 26, 28-36, 40-44, and 62, drawn to a first embodiment (paragraph 26).
- B. Claims 11-14, 51, and 60, drawn to a second embodiment (paragraph 29).
- C. Claims 15-25, drawn to a third embodiment (paragraph 31).

Further restriction of individual species within the groups between method and device must be elected after electing a group. If a single species is elected from A, B, or C, the further restriction applies as follows:

#### **Species A.**

- I. Claims 1, 3-10, 26, 28-36, 40, and 44, drawn to the method of manufacturing, classified in class 445, subclass 50.
- II. Claims 2 and 41-43, drawn to the device, classified in class 313, subclass 311.

Species B.

III. Claims 11-14 and 60, drawn to the method of manufacturing, classified in class 445, subclass 50.

IV. Claim 51 drawn to the device, classified in class 313, subclass 311.

Species C.

V. Claims 15-24, drawn to the method of manufacturing, classified in class 445, subclass 50.

VI. Claim 25, drawn to the device, classified in class 313, subclass 311.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method of manufacturing a photonic crystal filament can be manufactured by an alternative method such as a gas phase method, the gas-liquid solid method, the evaporation method, and the replication method.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
